

Evaluation pages + candidate (P, C)

Parse with P , chunk with C ,
and index $C(P)$

Retrieve fixed probe D
with declared R and K

Relevant = reference page
+ normalised answer span

$RCPS(P, C) = \text{mean}_{r \in R, k \in K} \text{MRR}@k$
 $(r, C(P), D), \quad K = \{1, 5, 10\}$

Rank candidates - no training
