Candidate pipelines

Parser candidates P_i

$P_1 \ P_2 \ \dots \ P_m$

Parsed page outputs

Intrinsic
score

Chunker candidates C_j

$C_1 \ C_2 \ \dots \ C_c$

Intrinsic
ranking

all $P_i \times C_j$ pairs

Compare
Rankings
(same chunker)

C1

Intrinsic
ranking
can mislead

Candidate corpora

$C_j(P_i), m \times c$

Index each corpus
